

# PlanCommand™ System Benefits for Architects and Engineers

Can your company afford to be behind the curve and not utilize leading edge (*not bleeding edge*) technologies? Are you ready to empower your firm with a proven solution that harnesses the power of the Web for project and document management, so you can concentrate on what your company does best?

## PlanCommand is a Project Document Lifecycle Application:

- From design through project completion PlanCommand provides a common forum for all project documents, notices and revisions
- Maximizes team productivity by providing 24/7 access to all phases of design and construction activity
- Provides embedded tools, such as online plan viewing with zoom capabilities, online collaboration with redlining and annotation, version/revision comparisons, and file sharing that simplify daily tasks in managing documents
- Project Administrator assigned password protection allows selectable levels of access to project files
- Maintains an audit trail of all project activity—of who did what and when—by user and document
- Its open-ended architecture enables an unlimited number of projects, customers and documents to be supported
- Utilizes WebDAV encrypted web folder technology—the most advanced security system available

## For the bid function, PlanCommand will:

- Simplify the bid management process and automate redundant tasks
- Manage the process of communicating “Invitation to Bid”

notifications, and addenda to bidders—automatically via e-mail or fax

- Maintain a record of all bidder activity, including the receipt and viewing of notifications and addenda as part of the project audit trail
- Distribute print charges according to the project manager’s assigned parameters

## For the build process, PlanCommand will:

- Monitor all construction documents from project start to finish
- Provide online ordering of prints from the local RSA reprographer, or one of the 120+ networked RSA print locations across the country
- Track all change orders and construction notices
- Create a project archive upon completion

*Planning Today... Building for Tomorrow*
