

PlanCommand™ System Benefits for General Contractors and Project Managers

Can your company afford to be behind the curve and not utilize leading edge (*not bleeding edge*) technologies? Are you ready to empower your firm with a proven solution that harnesses the power of the Web for project and document management, so you can concentrate on what your company does best?

For the construction team, PlanCommand will:

- Provide 24/7 availability of the current set for viewing and ordering prints
- Maximize team productivity in managing documents
- Manage the revision and version control of all project drawings, and maintain an accurate audit trail of who did what and when—by user and document
- Provide an easy to manage bid notification system that verifies both the receipt and viewing of notifications, addenda and project notices

For managing project documents, PlanCommand:

- Provides embedded tools, such as online plan viewing with zoom capabilities, online collaboration with redlining and annotation, version/revision comparisons, and file sharing that simplify daily tasks in managing documents
- Adds functionality to assist in compliance with ISO and government standards

- Enables the Project Administrator to determine password protection that allows selectable levels of access to project files

Project management and administrative capabilities include:

- Routing of print job tickets to the local RSA reprographer, or to any of 120 RSA print locations nationwide
- Project archiving of “as built” drawings, operation manuals, maintenance schedules, etc. that can be saved to a hard drive, CD or DVD
- Managing and controlling the change order process, to minimize construction waste caused by document mismanagement

- Centralized e-mail team member communication
- Maintaining a library of project specific files, such as operator manuals, photos, and raw/test analysis data

Planning Today... Building for Tomorrow
